Course Requirements :	Group Code :	Language:
Final Paper	240598701	English

Course Description

The study tour is a core activity of the Aviram Sustainability and Climate Program, and one of two intensive academic tours in Israel and in Europe.

Participants will be thoroughly debriefed about the nature of the tour, the hosting institutions, the schedule, and their commitments ahead of the tour.

The tour is held primarily in Hebrew, due to the bilingual nature of the Aviram program, as stated in advance.

Our point of contact for this activity is Adv. Rony Shaked, Aviram Program Manager.

Course Goals

The purpose of each study tour is to interact with leading academic institutions and local industry to gain a deeper understanding of the solutions developed in the fields of sustainability and climate, including sustainable supply chains across domains, sustainable

technologies (e.g., climate-tech), novel business models, environmental risk reduction, biodiversity conservation, and smart interventions in the food-energy-water-ecology-climate nexus.

This should inspire and inform innovative solutions to environmental concerns – which participants will develop and pivot by the end of the Aviram program.

Grading

This is a pass/fail activity pending participation.

Reading List

TBA closer to the tour.
