Final Paper 242407302 English

This class will provide a broad overview of the field of psychology in general and of political psychology in particular, and will place emphasis on psychology as a scientific discipline. Over the year we will learn about the different subfields of psychology and about the current questions and debates that are concerning political psychologists today.

We will also discuss the different ways to apply political psychological knowledge outside of the lab.

The goal of this course is to provide an understanding of basic psychological processes

as well as insight on how psychological factors impact political motivations, cognitions, and actions.

Grading

The grade in this course will be based on a final paper -- details in class.
