ENTRY TO ISRAEL DURING COVID[1]

Dear RRIS students,

For those who are currently abroad:

Please see detailed & updated official regulations and instructions towards your arrival [here](#).

In general, As of March 1, 2022, **tourists and student visa holders of all ages are permitted to enter Israel, vaccinated and unvaccinated alike**.

- Basically, you would just need to fill out and submit online the "**entry statement form**" within 10 days before your flight, and present the confirmation email you will receive, to the airline before boarding.

- It is **not** required to present a negative result on a COVID-19 test before boarding a flight to Israel, nor after landing in Israel.

Entry to campus

Since the "green pass" in Israel has been cancelled, there is no longer a requirement for "green pass" in order to enter campus or any other place in Israel.

Booster vaccinations in Israel

COVID vaccinations are normally available only at public Israeli health service provider locations, and for holders of Israeli health insurance only (including Reichman University health insurance).

For people with non-Israeli insurance, there are very few vaccination stations available throughout the country, in limited locations and opening hours, which change daily according to Ministry of Health decisions.
[To the list of vaccination centers](#) (information published in Hebrew only).

We wish you lots of health, and a successful academic year!

The Raphael Recanati International School team
